RE: docket identification (ID) number EPA-HQ-OPP-2016-0385

To the members of the Advisory Panel:

Glyphosate (Roundup's active ingredient) has been found in vaccines. We not only eat glyphosate in food, and breathe it, but it is being injected into the bloodstreams of people of all ages.

Moms Across America tested 5 vaccines for glyphosate and found it in all 5 vaccines.

Researcher Anthony Samsel PhD tested about 20 vaccines from various manufacturers for glyphosate and found it in Shingles, Varicella, MMR2, MMR-Var, Hepatitis B, DTaP, and flu.

This is a CRIMINAL ACT that requires that children be vaccinated with vaccines containing known neurotoxin, probable carcinogen, cardiovascular damaging chemical, reproductive effector which causes liver and kidney damage.

I request that the EPA, FDA, NIH and CDC to do a formal investigation into the widespread contamination and likely harm caused by glyphosate, test for the contamination of pesticides in all consumer products including vaccines, halt the mandate of vaccines. Additionally, I request that the EPA immediately change their policy to require long term full formulation safety testing with full disclosure labeling and revoke the license of glyphosate to prevent further contamination.
